- 11/01: VB @ ACE 4pm
- 11/02: XC League Finals

CHARGE ON!
SILVER KNIGHTS

RP Academic Guidance

Mrs. Tammy Sanchez continues to work with our seniors as the deadlines fast approach for applications to California universities. Mrs. Sanchez is also a wealth of knowledge regarding grants and scholarships. Students should meet with her to get major test dates and information regarding college fairs and other opportunities.

Principal's Message

Wow! The first week of the second quarter is in the books! Here we go again right? Well let's hope not. Our students are doing very well and I for one am excited to see what they will produce in this quarter. We have already had an awesome emergency preparedness fair presented by the 9th grade. It was great with helicopters and everything! I am very proud of the kids and their teachers? The 10th grade is next up with the Frankenstein trial held at Adelanto City Hall. It is very topical and should be great!

The Fall Harvest Festival is Friday starting at 6pm for all elementary students. The high school ASB students and other groups will have plenty of fun ready for the kids.

As we head toward the semester break, we need to focus on raising the bar for all of our students. I have asked each teacher to really work on finding the right amount of pressure to place on our students. I want them to be challenged, which means they should feel some anxiety from time to time about what they are doing. Lessons should be focused on a project based learning platform with an eye toward critical thinking. All subjects including but not limited to Social Studies, English, Math, Science and Foreign Language strive to ask those open-ended questions that provoke deeper thought processes and higher order thinking skills. This allows students to share their thoughts and opinions while adding meaning to the subject matter being learned and the product being created. It is always fun to see what the Silver Knights do next! Charge On!
